\* The 85th percentile speed is the speed, which 85% of the vehicles are not exceeding. Road speed limits are commonly determined by the 85th percentile, given that 85% of drivers will drive at or below a speed that is comfortable for the given road conditions.

Due to limitations of equipment used the classification of vehicles cannot be guaranteed as 100% accurate. All other parameters are deemed to be correct at the time recorded.

NPCC refers to the National Police Chiefs Council, formerly ACPO. The NPCC set the minimum enforcement threshold for forces across the UK.
