

Planters in Weldon Village

Four new planters at the centre of Weldon Village installed by our Village Caretaker in Nov 2021.

The planters are made from recycled plastic that is also recyclable. Each planter has a water reservoir containing 175l of water. This keeps 225l of compost watered using capillary matting. Planting is perennial with Phormium for height, colourful Cyclamen winter flowers and trailing variegated Ivy or Vinca Minor. All being well, spring will be greeted with dwarf Daffodils, dwarf Tulips and Muscari. But before that is Remembrance...

Please give generously to our Village Royal British Legion.
